- Test
- Integrate
- Communicate
- CSS
- HTML
- SQL
- GIT
- Deploy
- Secure
- Optimize
- UX / UI
- Flutter
- Docker
- Follow a Specification Document
- Java
- PHP
- Node.js
- Work in AGILE

WORK EXPERIENCES

Front-End Developer

Freelance

Junior Conseil

January 2024 - August 2025

Within the junior enterprise JC UTT, I worked on Passeport Carbone, a web application commissioned by the University of Technology of Troyes to raise student awareness about their carbon footprint. I designed the UI/UX and handled the majority of the front-end development.

REACT TYPESCRIPT PHP SYMFONY

Front-end Developer

● 6-month internship

Makina Corpus

July 2024 - January 2025

I worked on Présences, a web mapping application developed by Makina Corpus to organize office spaces in a flex-office environment. During my internship, I revamped the graphical interface for both web and mobile versions and added several features to enhance the user experience, the most significant being the authentication system.

REACT JAVASCRIPT PYTHON DJANGO

Mobile Developer

Freelance

V-Lock

February 2024 - August 2024

I collaborated with the startup V-Lock, based in Troyes, on the development of the mobile application supporting their anti-theft bike station system. I primarily contributed to mobile UI/UX design and the application development.

FLUTTER DART SUPABASE

Full-Stack Developer

● 3-month internship

Orange

April 2023 - July 2023

I completed this internship within the Agile Diamant team, contributing to the redesign of the intervention management information system. I worked on web applications and REST APIs with a hexagonal architecture, contributing to the development of user interfaces, configuration, and automation of checks, while strengthening my skills in Java/Spring and Angular development.
